DRAINING AND SLIMMING BODY TREATMENT

For the strong lipo reducing, draining and vasotonic effect this is the ideal treatment. It fights all the imperfections caused by cellulite, water retention, treatment of obesity which is localized and that which has spread, by **stimulating the lymphatic system, helping and promoting the elimination of waste and toxins, with decongestant.** It is the best choice for those with problems of micro-circulation and capillary fragility, swollen legs, cellulite and fluid retention.

Among the main active ingredients of this treatment are the 'Escin, considered the main molecule responsible for the vessel protective effects, characterized by a strong draining and detoxifying effect, useful in cases of accumulation of toxins, promotes micro circulation and cell turnover. In synergy with the pineapple, which acts by **promoting the drainage of the edematous tissue and improving capillary permeability;** Ivy, known for its astringent and anti-inflammatory properties that fight cellulite and orange peel and Carnitine, which carries the excess fats in the cells that metabolize it, the Drenactive allows 3 functions to be achieved with a single treatment simultaneously:

- Cleanse the skin and eliminate toxins
- Drain excess liquid
- Visibly reduce the treated areas.

The application system is simple and practical: it starts with the cleaning and purification of tissue to be treated with the Scrub with Sea Salt, proceeded by the application of concentrated active drainage; apply the Gel Mask leave the mask and end the treatment with Drenactive cream and a draining massage.

Treatment is indicated for people suffering from water retention on the thighs, knees, calves and ankles; who often feel heaviness and swelling in their legs and for people with problems of loss of firmness, consistency and elasticity of the skin.

SEA SALT BODY SCRUB

COD. 52051_ML 500

The body scrub Sea Salt is a natural product that can remove dead cells and impurities from the skin, thanks to the sea salt that renews the skin through gentle exfoliation. The Lipogel of which it is composed, the extract of Burdock by purifying notes, juniper with antiseptic and diuretic actions in synergy with oils of Wheat Germ and Soy, allow the Scub Drenactive to stimulate skin circulation and help eliminate the stagnation of excess fluids. He also emollient and restorative and makes the skin tissue more receptive and ready for subsequent treatments.

DRAINING AND SLIMMING GEL MASK

COD. 52053_ML 500

The exclusive formulation of this Gel Mask acts globally to counter cellulite performing a draining and invigorating. The high concentration of draining active ingredients including Escin, Dandelion, Pineapple and Horse Chestnut extract, helps to balance the excess fluid limiting their stagnation and promotes the reduction of fat deposits. The action on the silhouette is enhanced by Carnitine, that stimulates the process of turn-over of fats making them detach from the area where they are deposited, to degrade them and use them for energy production. It has the function of re-mineralize the deep tissues, favoring the disinfiltrates and lipolytic action to reduce the unsightly appearance of cellulite, protect the skin microcirculation and relieve from fatigue sensation and swelling.

ACTIVE CONCENTRATES DRAINING AND SLIMMING ACTION

COD. 52052_12 AMPOULES ML 15

The Mix of active ingredients from strong draining and reducing action that characterizes the formula of these concentrats, it is an indispensable support in the intensive treatment for combating and preventing cellulite. Centella Asiatica, Birch, Ivy and Horse Chestnut drain excess fluid, improves skin microcirculation and promote a slimming action, stimulating lipolysis and reducing fat accumulation. Improve skin texture and help restore skin elasticity.

DRAINING AND SLIMMING CREAM

COD. 52054_ML 500

COD. 52055_ML 250 (SELF CARE USE)

Its specific formulation acts in a direct and intense way on the epidermis, with a detoxifying and draining action, which reaches the deepest layers. The synergy of active ingredients favors the lipolysis mechanism and reactivates the functionality of the cutaneous microcirculation, thus promoting the drainage of excess fluid and facilitating the removal of toxins in the tissues infiltrated. Made with shea butter, nourishing and moisturizing, Almond Oil, extracts of pineapple, ivy, horse chestnut from the action reducing and draining, and Vitamin C that stimulates the formation of collagen, this cream, free from Parabens and paraffins can be used for draining treatments even on very sensitive skin.

ACTIVE PRINCIPLES

ESCIN is considered the main molecule responsible for vasoprotettori effects. E 'characterized by a strong draining and detoxifying effect useful in cases of accumulation of toxins, promotes microcirculation and cellular turnover, have stock vasoprotective and strengthening of vascular connective tissue. It 'used in the field mainly in cosmetic preparations for the treatment of cellulite, is a well tolerated and non-toxic functional principle and also exerts anti-reddening and soothing activities.

CARNITINE is a substance which represents a natural constituent of the cells of our body. Its action takes place by stimulating greater use of fat favoring an increased metabolism of lipid substrates.

By virtue of its properties potted protectors and anti edematous in association with those lipolytic it is used for the formulation of cosmetic products for slimming and firming action.
