## PERFECT BODY SOYA SYSTEM

### TREATMENT WITH SOY ISOFLAVONES ULTRA REDUCING MODELLING TOTAL BODY

#### Draining, Reducing, Modeling.

These are the fundamental steps for a correct reducing treatment. The Capri Beauty Line, has developed a new **total body reducing modelling treatment, three-dimensional, complete, versatile, safe and highly effective**. The line is composed of a series of products formulated with **Soy Isoflavones** and reducing modeling and draining active (Lecithin, Spirulina Algae, Caffeine, Escin, Carnitine, Bitter Orange, Bromelain, Cocoa, Kigelia Africana and Elastin Hydrolyzed) to offer a **treatment undisputed effectiveness, also suitable for people suffering from thyroid disorders, not thermo active and multifunctional**.

Isoflavones accelerate the production of collagen in the dermis and promote the breakdown of fat stores, with the obvious result that by the third week you will notice a substantial increase of elasticity and a reduction of orange peel of 32% and circumference of 3-4 cm. Using in the first sessions of the **Active Draining Concentrate**, you are going to eliminate excess fluid, waste products and toxins with a first purifying and detoxifying effect. Having released the tissues from water stagnation will automatically increase oxygenation and cell tropism. After having drained and purify areas with fat deposits, can proceed with the **Active Reducing Concentrate**: Soy Isoflavones in synergy with Bitter Orange, Caffeine, Bromelain and Cocoa, will act in a deep, intense and lasting, modulating the storage and fat mobilization, thus promoting localized fat reduction. Already from the first sessions will be visible from the adipose tissue reduction results. Completed the reducing step is then carried out with modeling the treated patient. Thanks to Active Concentrate Modelling release programmed with Soy Isoflavones, Lecithin, Kigelia Africana, Hydrolyzed Elastin, the support structures of the skin surface will be reinforced restoring the skin of the body elasticity, softness and firmness. Every phase of treatment has a philosophy and a mix of active ingredients dedicated to the result to be obtained. All this to offer to the professionals of the sector a complete system but versatile, suitable for all skin types, with certified raw materials of natural origin, no parabens or paraffins, easy to apply and formidable to yield and effective.

#### ACTIVE CONCENTRATE DRAINING FIRMING ACTION

**COD. 52030\_12 AMPOULES ML 15**  
Studied for the treatment of cellulite, it has a powerful draining action, ideal for the early stages of reducing treatments. It is composed of plant extracts of Centella Asiatica and Capsicum that stimulate microcirculation, and an active complex composed of Soy Isoflavones (Genistein), Spirulina Algae, Caffeine, Escin and Carnitine, which joined together make the Active Draining Concentrate Firming product ideal to help drain excess fluids from areas with fat deposits, which can then be treated in subsequent sessions with active reducing agents.

#### ACTIVE CONCENTRATE SLIMMING ACTION

**COD. 52031\_12 AMPOULES ML 15**  
Concentrated active release programmed which reinforce the support structures of the surface of the skin and restores the body's skin elasticity, softness and firmness. Their effectiveness is entrusted to a progressive mix of active ingredients that regulate the redistribution of excess liquid, firming and contouring the body in an effective and natural. Soy Isoflavones, Lecithin, African Kigelia, Hydrolyzed Elastin, are just some of the components of this mixture, ideal for the final stages of reducing treatments.

#### ACTIVE CONCENTRATE ELASTICIZING FIRMING ACTION

**COD. 52032\_12 AMPOULES ML 15**  
With its ingredients from the powerful reducing action and mobilization of fat, this concentrated active penetrates deep into the epidermis, stimulating the tissue to "dissolve" fatty deposits. The complex ultra active consists of Soy Isoflavones, natural extracts of Bitter Orange, Caffeine, Bromelain and Cocoa, acts so deep, intense and enduring, modulating storage and mobilization of fat, thus promoting localized fat reduction. Free tissue from waterlogging increasing oxygenation and tropism.

#### SLIMMING FIRMING GEL

**COD. 52035\_ML 500**  
**COD. 52036\_ML 500**  
**COD. 52037\_ML 250 (SELF CARE USE)**  
Reducing gel formulated with Soy Isoflavones, Caffeine, Carnitine and Spirulina, enhances the reducing action of the functional active concentrated improving the slimming effect, and in combating cellulite phenomena. Thanks to its composition, increases cellular metabolism and encourages the elimination of waste. It performs a lipolytic action with grease degradation, using it in the production of energy for cell metabolism. With the action of the Soy Isoflavones and Synephrine, it helps remove fat deposits and remodeling of the silhouette, visibly reducing skin "orange peel."

#### SLIMMING FIRMING CREAM

**COD. 52036\_ML 500**  
**COD. 52037\_ML 250 (SELF CARE USE)**  
Cream massage full-bodied and rich, ideal in the specific adjuvant treatment cellulite. By combining Lecithin and Soy Isoflavones, it supports the elimination of subcutaneous fat, visibly defining the silhouette. The Natural Moisturizing Factor NMF also returns to its physiological skin surface protection. It promotes the grease disposal and refines the line of thighs and buttocks, improving lymphatic insufficiency. Fights water retention and helps the recovery of elasticity and skin tone, thanks to its antioxidant and protective properties.

## ACTIVE PRINCIPLES

### SOY ISOFLAVONES

The Soy Isoflavones are defined phytoestrogens because they are substances that show a structure very similar to that of natural estrogens. Some studies have shown a 'physiological activity, that is, a direct effect, specifically on the adipocytes, demonstrating that soy Isoflavones are able to modulate the growth and differentiation of the adipose tissue and interfere with lipid metabolism. Against cellulite with two mechanisms: reduce the amount of lipids and reinforce the cutaneous epithelium. Isoflavones have also antioxidant activity due to their capacity scavenger of free radicals and protective from the damage induced by UV radiation.

Centella Asiatica, Spirulina, Escin, Carnitine, Capsicum.

DRAIN

Amara Orange, Caffeine, Bromelain, Cocoa, Lecithin.

REDUCE

Lecithin, Kigelia Africana, Hydrolyzed Elastin, Vitamin C.
