PERFECT EPIL

PROFESSIONAL DEPILATION LINE

Perfect Epil, a new line of products for the treatment of the skin after the professional wax depilation, is able to:

- Remove any residual wax epilating
- Soothe the treated area and give relief
- Nourish the skin and hydrate the stratum corneum
- Retard the regrowth of unwanted hair

With the hair removal are eliminated superficial skin cells that serve to protect the epidermis. The skin is then prone to irritation and red dots and can easily form unpleasant blemishes such as pimples and ingrown hairs. It is therefore important, after each treatment of hair removal, a targeted care cosmetic acting in two phases:

1 REBALANCING - SOOTHING

2 EMOLLIENT - EXFOLIATING

The Capri Beauty Line, offers **cosmetic products specifically created to slow the growth of hair and giving immediate comfort to the clipped area.** For a soft and silky smooth skin, long.

AFTER-WAXING SOOTHING OIL

COD. 57801_ML 500

Soothing lotion on oily base, cleanses the skin by removing the wax residue. The Chamomile extract has an activity decongestant and anti-reddening, this makes it particularly suitable for sensitive and easily irritated skin. Thanks to its active such as hypericum extract, by the action of anti-inflammatory and healing and bisabolol, soothing and calming, it is indicated to relieve states itchy, irritation due to wax tear.

LENITIVE / RETARDANT AFTER-WAX EMULSION

COD. 57805_ML 500

Ideal treatment after hair removal to restore the right level of hydration and immediately soothe the skin. The synergic action of its extracts has decongestant properties and lightening for the zinc oxide and the Lactic Acid; moisturizing and protective with Natural Extract of Calendula, ultimately inhibits and slows hair growth thanks to retardant properties of papain. Made with an ideal formula for all seasons, it is referred to as post-depilatory product to cleanse the skin from any traces of wax fat-soluble, and as completion of depilatory treatment.

HAIR GROWTH RETARDANT FLUID AMPOULES

COD. 57810_12 AMPOULES ML 15

Undiluted fluid post-epilating is the result of research activity that some phyto natural extracts show the growth of unwanted hair. The mix of natural ingredients contrasts hair regrowth and acts on the hair bulb, slowing the proliferative processes. The action is provided by a combination of enzymatic substances of natural origin, extracted from papaya and Gymnema Silvestris, famous for its ability to slow down hair regrowth. The presence of Aloe Vera in the formula makes this the perfect complement active concentrate post-hair removal for sensitive and delicate skin.

ACTIVE PRINCIPLES

PAPAIN is a proteolytic enzyme belonging to the class of hydrolases, that is extracted from the immature fruit of papaya (Carica papaya). Among the cosmetic properties it is impossible not to mention the benefit from the Papain, the enzyme prince contained in the fruit, which carries out a very important post hair removal. Creams made from papaya, if applied after hair removal can greatly slow the growth of hair and soothe any skin irritation. Papain, in fact, penetrating into the pilosebaceous follicle obstructs the regrowth thanks to the enzyme.
