BODY

ACIDS ON THE SURFACE, EXOSOMES IN DEPTH: INTELLIGENT REGENERATION THAT EXFOLIATES, REPAIRS AND ENHANCES

Esoacid Complex is the new Capri Beauty Line face and body system that brings a new dimension of **regenerative cosmetics** to the world of professional aesthetics. An advanced system that integrates **new-generation acids and highly bioactive exosomes**, where peels act on the skin's surface, while exosomes guide deep regeneration, modulating the skin's biological responses and amplifying the effectiveness of each treatment. The heart of Esoacid Complex is **balance. The acids act in a targeted and calibrated way** to renew and refine the skin texture, improving brightness, uniformity and texture, while plant-based exosomes, derived from Centella Asiatica, **work more deeply to support cell regeneration mechanisms**, improving intercellular communication, enhancing the skin's response and making the skin more receptive, vital and reactive in a healthy way. Each acid is accompanied by a Dermal Modulator and a Dermal Activator, with high-precision, intelligent and fully replicable protocols that allow you to work safely and achieve immediate results on wrinkles, impurities, blemishes, dehydration, skin stress, fat, cellulite and water retention. **New generation cosmetics**, designed for professionals who require advanced, biotechnological solutions capable of activating the skin's natural repair processes and transforming skin quality with a truly regenerative approach.

ACID CLEANSER ESOACID COMPLEX WITH GLYCOLIC ACID, LYSINE AND TARTARIC ACID

COD. 58001_ML 500

Professional cleanser formulated with selected alpha hydroxy acids to optimize surface exfoliation and prepare the skin for treatments with high concentrations of acids. Removes impurities, sebum and dead skin cells, creating ideal conditions for maximize the penetration of subsequent active ingredients.

ACIDIFYING PRE-PEEL ESOACID COMPLEX WITH TARTARIC ACID, LACTIC ACID AND MANDELIC ACID

COD. 58002_ML 500

The professional Acidifying Solution is designed for initial exfoliation that removes dead cells and surface thickening without the use of mechanical particles. The calibrated pH promotes progressive acidification, which is essential for achieving a stable and effective skin response.

NEUTRALIZER ESOACID COMPLEX WITH SODIUM BICARBONATE, ALOE VERA, GLYCEROL AND PANTHENOL

COD. 58003_ML 500

Formulated to immediately and controllably interrupt the action of the acids used during treatment, it reduces the risk of post-peeling irritation, alleviates sensations of heat and promotes uniform skin recovery, ensuring the correct technical closure of any Esoacid Complex procedure.

CREAM STABILIZING POST-ACID ESOACID COMPLEX

WITH EXOSOMES, PANTHENOL, ALOE VERA, ST. JOHN'S WORT,
COLLAGEN, CALENDULA, VITAMIN E, BISABOLOL, GAMMA ORYZANOL,
VITAMIN PP + SUNSCREEN

COD. 58004_ML 250

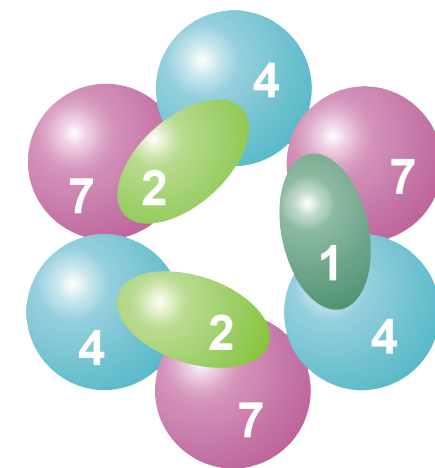

Professional cream is designed to restore balance, comfort and protection after treatments with Esoacid Complex products. The synergy of exosomes and repairing active ingredients such as panthenol, aloe vera, St. John's wort, calendula and bisabolol promotes rapid and uniform skin recovery, reducing redness and sensations of heat.

ESO RADIANCE ACID CREAM ACID CREAM WITH ALPHA HYDROXY ACIDS AND PLANT-DERIVED EXOSOMES + SUNSCREEN

COD. 58005_ML 50

Perfect for home maintenance after professional Esoacid Complex protocols, it is formulated with a blend of Alpha Hydroxy Acids and Plant Exosomes with regenerative properties and designed to improve radiance, uniformity and skin quality. It smooths, brightens and evens out the complexion, leaving it looking firmer, more hydrated and toned.

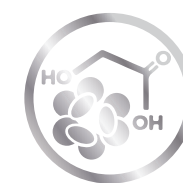

WHAT ARE EXOSOMES

Exosomes are biological micro-vesicles that convey functional signals between cells. In advanced cosmetic treatment:

- They improve cellular communication;
- They make tissue more reactive and receptive;
- They support skin regeneration processes;
- They carry biological messages;
- They activate repair processes;
- They enhance the effectiveness of acids;
- They make the skin more reactive and intelligent.

They are not a 'classic' active ingredient, but biological mediators and carriers of a new generation. They don't do... but they make things happen!

“*Centella Asiatica exosomes are cutting-edge plant extracellular vesicles used in cosmetics to deliver active ingredients deep into the skin. They stimulate collagen and elastin production, promote cell renewal, skin repair and hydration, and have a marked anti-ageing effect.*”

ESOACID
COMPLEX

ESOGGLICO

This is ESOACID COMPLEX's advanced regenerating protocol dedicated to skin that needs a decisive and immediately visible anti-ageing treatment. Glycolic acid renews the skin's surface with power and precision, while exosomes and Botox-like peptides stimulate deep regeneration processes, improve firmness and elasticity, and enhance the skin's biological response. It is the strategic choice when you need a decisive anti-ageing treatment, rapid results and a treatment capable of reactivating "tired" or unresponsive skin, immediately improving radiance, wrinkles, texture and tone.

PHOTOSENSITIZING

DERMAL REGENERATING PEEL ESOGLICO

WITH GLYCOLIC ACID AND PLANT-DERIVED
EXOSOMES

COD. 58011_ML 30

This professional peel has a regenerating and intensive smoothing action and is formulated with glycolic acid which, in synergy with plant exosomes, quickly renews the surface, refines the texture and brightens the face, generating a powerful stimulus for cell turnover. Suitable for mature, thickened or unresponsive skin, it is the ideal intensive step when rapid and visible anti-ageing treatment is required.

ESOGGLICO DERMAL MODULATOR

WITH GLYCOLIC ACID, PLANT-DERIVED
EXOSOMES, AND ACTIVE ANTI-AGE & BOTOX-
LIKE PEPTIDES

COD. 58012_ML 100

High-performance professional concentrate formulated to target the structural signs of skin ageing. The presence of glycolic acid promotes constant micro-exfoliation, plant exosomes act as biological vectors and the peptide complex works deeply to combat loss of tone, improve elasticity and skin relaxation, giving a more relaxed and compact appearance.

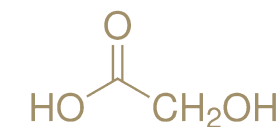

ESOGGLICO DERMOVEHICULATING ACTIVATOR

WITH GLYCOLIC ACID, PLANT-DERIVED EXOSOMES,
AND ACTIVE ANTI-AGE & BOTOX-LIKE PEPTIDES

COD. 58013_ML 250

Professional treatment with dermo conditioning and restructuring properties, amplifies the effectiveness of active ingredients and improves the biological response of skin tissue during the ESOGLICO protocol. This is the technical phase that revitalises the skin, optimising the transition from exfoliation to the functional reconstruction phase.

GLYCOLIC ACID

Glycolic acid is the alpha hydroxy acid (AHA) of reference in professional skin renewal treatments. Thanks to its low molecular weight, it effectively penetrates the surface layers of the skin, promoting controlled and uniform exfoliation. It works by breaking the bonds between corneal cells, promoting gradual and physiological detachment of surface cells. This process stimulates skin renewal, improving texture, wrinkles, firmness and evenness of tone.

ESO RADIANCE ACID SERUM GLICO

DERMOBOOSTER REGENERATING SMOOTHING
WITH GLYCOLIC ACID, PLANT-DERIVED
EXOSOMES AND ACTIVE ANTI-AGING AND
BOTOX-LIKE PEPTIDES

COD. 58014_ML 30

Regenerating booster with smoothing action, visibly improves radiance, wrinkles and skin firmness. Promotes gentle skin renewal and enhances natural regeneration processes, giving a more relaxed, firmer and radiant appearance.

ESOGGLICO TREATMENT PROTOCOL

1. **ACID CLEANSER ESOACID COMPLEX:** Apply to face, neck, and décolleté, avoiding the eye area, and massage in with circular motions. Remove with warm water.
2. **ACIDIFYING PRE-PEEL ESOACID COMPLEX:** Apply a generous amount to face, neck, and décolleté with a brush, massaging gently. Leave on for a couple of minutes, rinse with water, and pat dry.
3. **NEUTRALIZER ESOACID COMPLEX:** Gently massage all over the face and remove with water and a cotton pad.
4. **DERMAL REGENERATING PEEL ESOGLICO:** Apply with a brush and leave on for 10–15 minutes (start at 10 minutes for the first session and increase according to tolerability). Remove with water and pat dry the treated area.

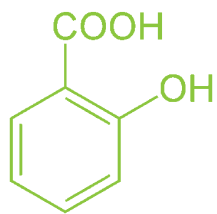

5. **NEUTRALIZER ESOACID COMPLEX:** Gently massage all over the face and remove with water and a cotton pad.
6. **ESOGGLICO DERMAL MODULATOR:** Apply a small amount of product and massage with light movements until completely absorbed.
7. **ESOGGLICO DERMOVEHICULATING ACTIVATOR:** Apply an appropriate amount of product with a brush and leave on for 10–15 minutes, adjusting the time according to the client's sensitivity. Remove thoroughly with water and dry the treated area.
8. **ESOGGLICO DERMAL MODULATOR:** Apply a small amount of product and massage with light movements until completely absorbed.

9. **CREAM STABILIZING POST-ACID ESOACID COMPLEX:** Apply an even layer to the face, neck, and décolleté and massage gently until absorbed.

RECOMMENDED HOME- CARE

To prolong and stabilize the results obtained in the salon, we recommend applying a few drops of **Eso Radiance Acid Serum Glico** daily to cleansed skin. After complete absorption, apply **Eso Radiance Acid Cream**.

SALICYLIC ACID

Salicylic acid is a beta hydroxy acid (BHA) with keratolytic, purifying and rebalancing properties. Being a fat-soluble molecule, it is able to act effectively inside the pore, helping to free the follicular ostium, reduce blockages and visibly improve skin texture. It helps to reduce shine and combat the formation of blackheads.

NON-PHOTOSENSITIZING

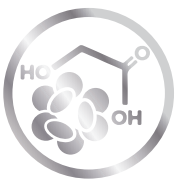

DERMAL REGENERATING PEEL ESOPURE
WITH SALICYLIC ACID AND PLANT-DERIVED EXOSOMES

COD. 58021_ML 30
Salicylic acid, thanks to its lipophilic nature, penetrates the follicles, dissolves sebaceous plugs, frees comedones and works selectively on impure areas, leaving the skin cleaner and mattified. The presence of plant exosomes supports natural repair processes, improving tissue quality, reducing congestion and promoting more uniform recovery.

ESOPURE DERMAL MODULATOR
WITH SALICYLIC ACID, PLANT-DERIVED EXOSOMES, NIACINAMIDE AND ACTIVE MARINE EXTRACT

COD. 58022_ML 100
A skin-purifying concentrate with sebum-normalising and anti-blemish action, it is designed to increase the effectiveness of the Esopure protocol and improve the balance of impure, shiny or acne-prone skin. It helps the skin to regain a cleaner, more balanced and stable condition, making it more receptive to the subsequent steps of the treatment and more resistant to recurring imperfections.

ESOACID
COMPLEX

ESOPURE

Designed for widespread impurities, comedones, blackheads, hyperseborrhea, clogged pores and acne, it leaves the skin cleaner, mattified and smoother. Salicylic Acid penetrates the pores, dissolves oxidised sebum, frees comedones and quickly reduces imperfections and skin congestion caused by acne. The synergy with exosomes, niacinamide and active marine extract amplifies the purifying action, dries excess sebum, making the tissue more resistant to recurring imperfections.

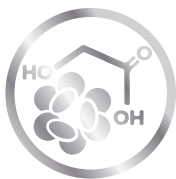

ESOPURE DERMOMOVEHICULATING ACTIVATOR
WITH SALICYLIC ACID, PLANT-DERIVED EXOSOMES, NIACINAMIDE AND ACTIVE MARINE EXTRACT

COD. 58023_ML 250
Active compound formulated to maximise the Esopure protocol, increasing the ability of impure skin to absorb purifying active ingredients and optimising deep cleansing of the tissue. Its creamy base with dermo-vehiculating action promotes the movement of active ingredients into the pores, promoting the release of sebaceous residues.

ESO RADIANCE ACID SERUM PURE
DERMAL BOOSTER PURIFYING REGENERATING WITH SALICYLIC ACID, PLANT-DERIVED EXOSOMES, NIACINAMIDE AND ACTIVE MARINE EXTRACT

COD. 58024_ML 30
Rebalances impure, shiny and acne-prone skin, regulates sebum and reduces shine and imperfections, leaving skin cleaner, matt and healthy. Essential as a home care product, it can also be used on the most sensitive and reactive skin types.

ESOACID
COMPLEX

ESOYAL

This system is designed for skin that has lost volume, elasticity and comfort, or that shows signs of structural dehydration. The combination of hyaluronic acid with exosomes, alpha hydroxy acids and plumping peptides activates a gentle but extremely effective renewal process: the skin immediately appears fuller, more hydrated, smoother and firmer. Ideal for dehydrated, thin, mature or stressed skin, it is the perfect treatment when you want to achieve a gentle anti-ageing effect, restore density and radiance, or recondition the skin after periods of climatic stress (post-summer and post-winter).

NON-PHOTOSENSITIZING

ESOYAL DERMOREGENERATING PEEL
WITH HYALURONIC ACID, PLANT-DERIVED EXOSOMES, ALPHA HYDROXY ACIDS AND PLUMPING PEPTIDES

COD. 58031_ML 30
The combined presence of AHA and a plumping complex based on hyaluronic acid hyaluronic acid, peptides and plant exosomes enables a synchronised dual action: it progressively and uniformly smooths the surface while increasing structural hydration deep down, improving elasticity and comfort and activating the regenerative response of thinning areas.

ESOYAL DERMIC MODULATOR
WITH HYALURONIC ACID, PLANT-DERIVED EXOSOMES, ALPHA HYDROXY ACIDS, ACTIVE BOTOX-LIKE PEPTIDES AND ANTI-AGE PEPTIDES

COD. 58032_ML 100
Its formula combines regenerating and firming active ingredients with a structural moisturising system capable of improving, in a single application, skin volume, elasticity and comfort. It works on tissue density, promoting immediate recovery of thinning and stressed areas and making the skin more even and radiant.

ESOYAL DERMOMOVEHICULATING ACTIVATOR
WITH HYALURONIC ACID, PLANT-DERIVED EXOSOMES, ANTI-AGE ACTIVE PEPTIDES AND FITO LIFTING COMPLEX

COD. 58033_ML 250
Its creamy texture deeply delivers a combined system of Hyaluronic Acid, Glycosaminoglycans, Anti-Ageing Peptides and Plant Exosomes, immediately improving volume, elasticity and comfort. The biomimetic moisturising elements improve the quality of the skin barrier, leaving the tissue fuller, more uniform and visibly more compact. Skin is immediately softer, smoother and more radiant.

ESO RADIANCE ACID SERUM YAL
REGENERATING PLUMPING DERMAL BOOSTER WITH HYALURONIC ACID, PLANT-DERIVED EXOSOMES, ALPHA HYDROXY ACIDS, BOTOX-LIKE AND ANTI-AGE ACTIVE PEPTIDES

COD. 58034_ML 30
Formulated to act through progressive epidermal renewal, it works on the surface with AHAs that smooth gradually and evenly, while deep down, hyaluronic acid and exosomes increase structural hydration, activating the regenerative response with an anti-ageing effect.

ESOPURE TREATMENT PROTOCOL

- 1. ACID CLEANSER ESOACID COMPLEX:** Apply to face, neck, and décolleté, avoiding the eye area, and massage in with circular motions. Remove with warm water.
- 2. ACIDIFYING PRE-PEEL ESOACID COMPLEX:** Apply a generous amount to face, neck, and décolleté with a brush, massaging gently. Leave on for a couple of minutes, rinse with water, and pat dry.
- 3. NEUTRALIZER ESOACID COMPLEX:** Gently massage all over the face and remove with water and a cotton pad.
- 4. DERMAL REGENERATING PEEL ESOPURE:** Apply with a brush and leave on for 10–15 minutes (start at 10 minutes for the first session and increase according to tolerability). Remove with water and pat dry the treated area.

- 5. NEUTRALIZER ESOACID COMPLEX:** Gently massage all over the face and remove with water and a cotton pad.
- 6. ESOPURE DERMAL MODULATOR:** Apply a small amount of product and massage with light movements until completely absorbed.
- 7. ESOPURE DERMOMOVEHICULATING ACTIVATOR:** Apply an appropriate amount of product with a brush and leave on for 10–15 minutes, adjusting the time according to the client's sensitivity. Remove thoroughly with water and dry the treated area.
- 8. ESOPURE DERMAL MODULATOR:** Apply a small amount of product and massage with light movements until completely absorbed.

- 9. CREAM STABILIZING POST-ACID ESOACID COMPLEX:** Apply an even layer to the face, neck, and décolleté and massage gently until absorbed.

RECOMMENDED HOME-CARE

To prolong and stabilize the results obtained in the salon, we recommend applying a few drops of **Eso Radiance Acid Serum Pure** daily to cleansed skin. After complete absorption, apply **Eso Radiance Acid Cream**.

ESOYAL TREATMENT PROTOCOL

- 1. ACID CLEANSER ESOACID COMPLEX:** Apply to face, neck, and décolleté, avoiding the eye area, and massage in with circular motions. Remove with warm water.
- 2. ACIDIFYING PRE-PEEL ESOACID COMPLEX:** Apply a generous amount to face, neck, and décolleté with a brush, massaging gently. Leave on for a couple of minutes, rinse with water, and pat dry.
- 3. DERMAL REGENERATING PEEL ESOYAL:** Apply with a brush and leave on for 15 minutes. Remove with water and pat dry the treated area.

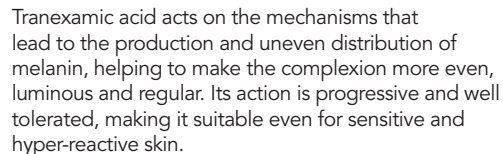

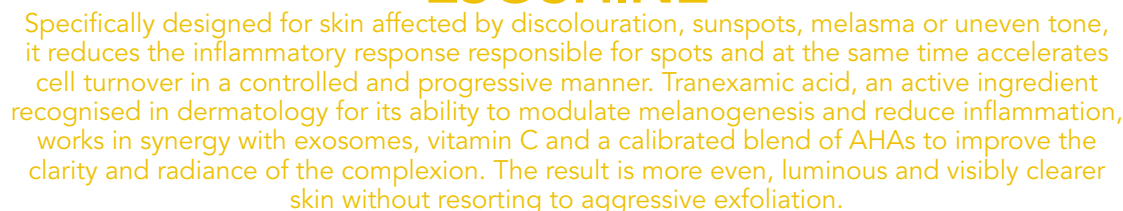

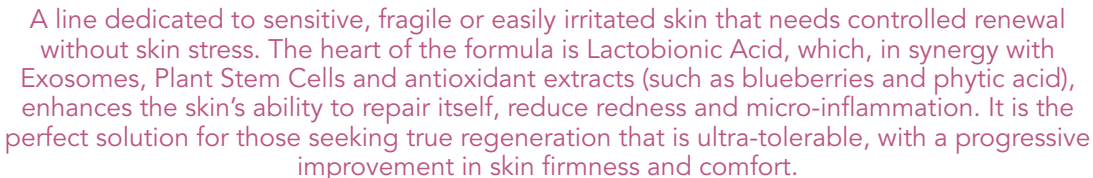

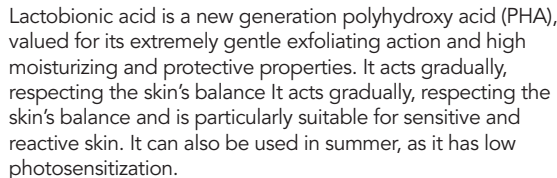

- 4. ESOYAL DERMAL MODULATOR:** Apply a small amount of product and massage with light movements until completely absorbed.
- 5. ESOYAL DERMOMOVEHICULATING ACTIVATOR:** Apply an appropriate amount of product with a brush and leave on for 10–15 minutes, adjusting the time according to the client's sensitivity. Remove thoroughly with water and dry the treated area.
- 6. ESOYAL DERMAL MODULATOR:** Apply a small amount of product and massage with light movements until completely absorbed.

- 7. CREAM STABILIZING POST-ACID ESOACID COMPLEX:** Apply an even layer to the face, neck, and décolleté and massage gently until absorbed.

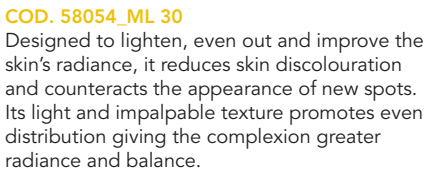

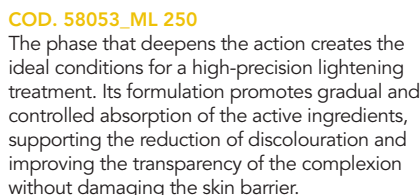

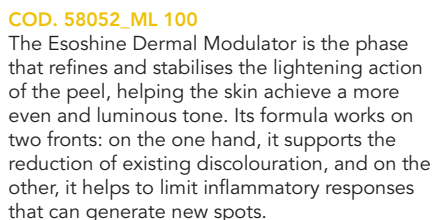

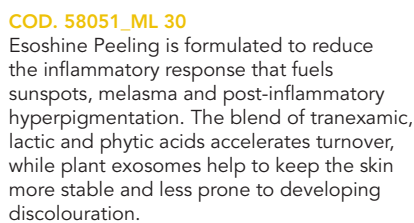

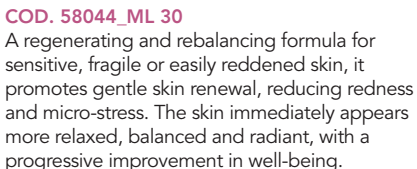

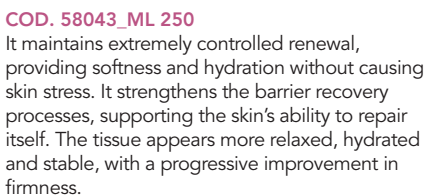

RECOMMENDED HOME-CARE

To prolong and stabilize the results obtained in the salon, we recommend applying a few drops of **Eso Radiance Acid Serum Yal** daily to cleansed skin. After complete absorption, apply **Eso Radiance Acid Cream**.

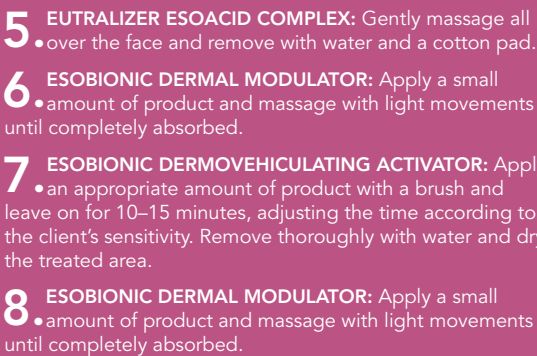

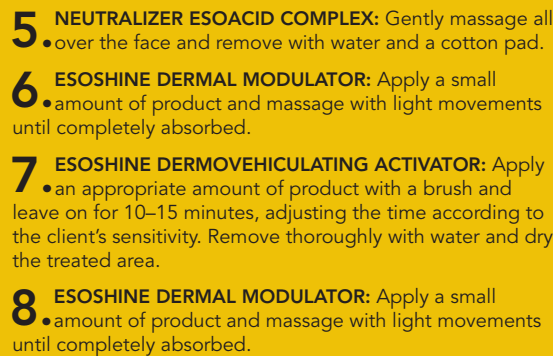

COD. 58041_ML 30
Esobionic Peeling renews the skin in a controlled manner, retains moisture and gives an even glow without causing irritation. Plant Exosomes support repair processes and reduce micro-inflammation, while Phytic Acid acts as a mild antioxidant to reduce redness and dullness.

- 1. ACID CLEANSER ESOACID COMPLEX:** Apply to face, neck, and décolleté, avoiding the eye area, and massage in with circular motions. Remove with warm water.
- 2. ACIDIFYING PRE-PEEL ESOACID COMPLEX:** Apply a generous amount to face, neck, and décolleté with a brush, massaging gently. Leave on for a couple of minutes, rinse with water, and pat dry.
- 3. NEUTRALIZER ESOACID COMPLEX:** Gently massage a over the face and remove with water and a cotton pad.
- 4. DERMAL REGENERATING PEEL ESOBIONIC:** Apply with a brush and leave on for 10–15 minutes (start at 10 minutes for the first session and increase according to tolerability). Remove with water and pat dry the treated area.

- 1. ACID CLEANSER ESOACID COMPLEX:** Apply to face, neck, and décolleté, avoiding the eye area, and massage in with circular motions. Remove with warm water.
- 2. ACIDIFYING PRE-PEEL ESOACID COMPLEX:** Apply a generous amount to face, neck, and décolleté with a brush, massaging gently. Leave on for a couple of minutes, rinse with water, and pat dry.
- 3. NEUTRALIZER ESOACID COMPLEX:** Gently massage a over the face and remove with water and a cotton pad.
- 4. DERMAL REGENERATING PEEL ESOSHINE:** Apply with a brush and leave on for 10–15 minutes (start at 10 minutes for the first session and increase according to tolerability). Remove with water and pat dry the treated area.

ESOSLIM

ESOSLIM is the body protocol of ESOACID COMPLEX designed to act decisively on cellulite, water retention and localized fat deposits. Polyglucuronic acid, a new-generation biotechnological active ingredient, promotes the mobilisation of fat deposits and the drainage of excess fluids. In synergy with Plant-based Exosomes, in synergy with Plant Exosomes, Phosphatidylcholine, Carnitine and highly active natural extracts (such as Carnivorous Plant), the protocol improves the appearance of orange peel skin, stimulates microcirculation and restores a more defined and slender silhouette. The skin's texture immediately appears smoother, firmer and more even. Session after session, the tissue becomes less hard and congested, swelling is reduced and the skin acquires new vitality, with a tangible improvement in tissue quality.

ESOSLIM is ideal for all stages of cellulite (oedematous, fibrous and compact) and for areas with lymphatic stagnation or localized accumulations. Although it is a "strong" treatment, it is well tolerated even by sensitive skin on the body, because its action is deep but not irritating.

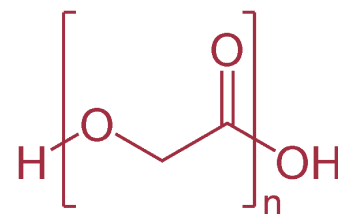

*Intensive
remodelling
Deep drainage
Firmer, more
even skin*

ESOSLIM BODY DERMAL PREPARATOR WITH ALPHA HYDROXY ACIDS AND EXOSOMES

COD. 58061_ML 500

The Esoslim Preparer is the phase that "awakens" the body tissue before the reducing treatment. Alpha Hydroxy Acids work on the surface, releasing the micro-adhesions that make the skin thickened and unresponsive, while Exosomes promote a more vital skin environment that is ready for absorption. The immediate result is softer, more even and prepared skin, capable of responding better to the lipolytic active ingredients that will be applied subsequently.

POLYGLUCURONIC ACID

Acts simultaneously on four new targets:

- Reduces lipogenesis and therefore fat accumulation
- Activates the ATGL (Adipose Triglyceride Lipase) enzyme, which plays an important role in lipolysis
- Promotes the transport of fatty acids to peripheral tissues and their use as a source of energy
- Inhibits the differentiation of preadipocytes into mature adipocytes.

ESOSLIM REDUCING BODY PEEL WITH EXOSOMES, POLYGLUCURONIC ACID, ALPHA HYDROXY ACIDS, CARNIVOROUS PLANT EXTRACT, PHOSPHATIDYLCHOLINE AND CARNITINE

COD. 58062_ML 100

Esoslim Reducing Peeling acts specifically on cellulite and fluid retention and is perfect for fibrous, compact or painful cellulite. It promotes the mobilisation of accumulations and faster drainage of fluids, gradually lightening the tissue. Session after session, critical areas appear less compact, more drained and lighter, with visibly finer skin texture.

ESOSLIM LEAVE-ON REDUCING ACTIVE WRAP WITH EXOSOMES, KAOLIN, POLYGLUCURONIC ACID, ALPHA HYDROXY ACIDS, CARNIVOROUS PLANT EXTRACT, PHOSPHATIDYLCHOLINE AND CARNITINE

COD. 58063_ML 500

Esoslim Leave-On Reducing Active Wrap works like a clearing house for areas weighed down by water retention and fat deposits. Ideal for 'hard' fatty areas or areas congested with inflammation, it helps reduce the feeling of swelling and gives the skin a firmer, drier and more defined appearance.

ESOSLIM ACIDIC REDUCING CREAM WITH EXOSOMES, POLYGLUCURONIC ACID, ALPHA HYDROXY ACIDS, CARNIVOROUS PLANT EXTRACT, PHOSPHATIDYLCHOLINE AND CARNITINE

COD. 58064_ML 500

This is the professional phase that completes and enhances the reducing treatment, working in synergy with the beautician's manoeuvres. Its active formulation supports the remodelling already underway, promoting better tissue mobility, a reduction in the compactness typical of fibrous areas and a gradual uniformity of the skin surface.

ESOSLIM ACID REDUCING CREAM WITH EXOSOMES, POLYGLUCURONIC ACID, ALPHA HYDROXY ACIDS, CARNIVOROUS PLANT EXTRACT, PHOSPHATIDYLCHOLINE AND CARNITINE

COD. 58065_ML 250

Designed to help improve the appearance of cellulite and localised fat deposits, it makes the skin visibly smoother, firmer and more even. The rich but quickly absorbed texture is ideal for daily massage and leaves the skin soft and smooth. A daily ritual that helps the body achieve a more harmonious and defined silhouette, prolonging the benefits of salon treatments.

ESOSLIM TREATMENT PROTOCOL

- 1. EXENTIAL DROPS DRAINING:** Apply to the main lymphatic points (inguinal, popliteal) and perform gentle lymphatic stimulation and drainage maneuvers.
- 2. ESOSLIM BODY DERMAL PREPARATOR:** Apply the product to the areas to be treated and massage with light, broad strokes until completely absorbed, without rinsing.
- 3. ESOSLIM REDUCING BODY PEEL:** Apply a generous amount to the most critical areas and massage with pinching movements until completely absorbed.

- 4. ESOSLIM LEAVE-ON REDUCING ACTIVE WRAP:** Spread over the entire treated area and leave on under the pad for about 15 minutes. After this time, remove the pad and massage until completely absorbed, using draining maneuvers.

- 5. ESOSLIM ACIDIC REDUCING CREAM:** Apply the cream to the treated areas and proceed with a technical, reducing massage, using deep, continuous movements until the product is completely absorbed.

RECOMMENDED HOME-CARE

To maintain the treatment's active and progressive results, apply **Esoslim Acid Reducing Cream** daily to the affected areas. Once a week, apply **Mandelic Complex Body Exfoliating Gel** – code 54025 – and massage until completely absorbed.
