

RIGENERA

REVITALIZING AND REGENERATING LINE
FOR ALL SKIN TYPES

WHY RIGENERA?

Designed to completely regenerate and revitalize the skin, **both on the surface and in depth**, the new RIGENERA line is an extraordinary skin renewal program, which reduces all signs of chrono-aging. It has the ability to **reduce the main signs of aging** both of the chromatic type such as dark spots or uneven complexion, than of the structural type such as sagging and loss of elasticity, wrinkles, dryness and skin fragility.

The products of the line allow to create a **double intervention strategy aimed at solving the real needs of the skin with a transversal use**: for professional use, they can be included in the new protocols, enriching and strengthening the systems used up to now; for home use, daily application will strengthen and awaken the epidermal structures, deeply hydrate, stimulate cell regeneration and renewal and protect the skin from external attacks.

They have been formulated with Active ingredients that act through an intelligent multi-stage system, **provide a gradual release over time for the benefit of the different layers of the epidermis**. The RIGENERA line can also be used successfully in the professional field, enhancing the effectiveness of aesthetic surgical treatments such as pre / post surgery, resurfacing, laser, radiofrequency, micro needling and peeling.

YOUR FACE THANKS TO
AN EXTRAORDINARY SKIN
RENEWAL PROGRAM

AGE BACK TECHNOLOGY

Face Serum with Relaxing Action and High Intra-Dermal Penetration Capacity

PROFESSIONAL FORMULA

With Argireline®, Inyline® and Hyaluronic Acid

30 ML

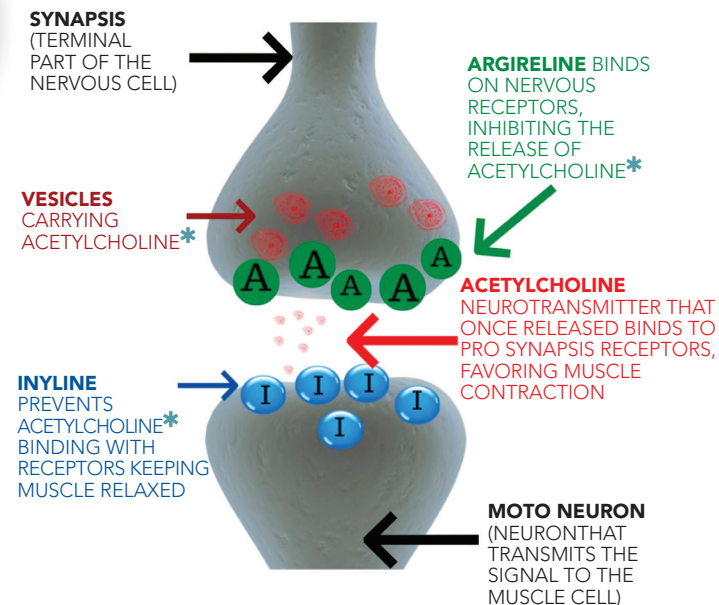

Inspired by the most modern canons of aesthetic medicine, **AGE BACK TECHNOLOGY Serum** is formulated with two Botox Like Active Peptides: Argireline® and Inyline® which, by acting on the pre and post synaptic receptors of motor neurons, block signal transmission avoiding muscle contraction and promoting complete relaxation of the facial muscles. A new generation lifting action, the result of the latest studies in cosmetic technology, which thanks to the presence in the formula of Hyaluronic Acid with high penetration capacity, combines the moisturizing and filling action of the latter active ingredient, with an immediate lifting effect thanks to the "biomimetic" agents with botulinum-like action that act by directly stimulating muscle relaxation with a consequent increase in the synthesis of collagen and elastic fibers in the skin.

THE COMPLEXES OF ARGIRELINE®, INYLINE® AND HYALURONIC ACID, TRIPLE ACTIVE, ACT THROUGH AN INTELLIGENT MULTI-STAGE SYSTEM, PROVIDING A GRADUAL RELEASE OVER TIME FOR THE BENEFIT OF THE DIFFERENT LAYERS OF THE EPIDERMIS.

Suitable for all skin types, it can also be used successfully in the professional field, enhancing the effectiveness of aesthetic surgical treatments such as pre / post surgery, resurfacing, laser, radiofrequency, micro needling and peeling.

ACETYLCHOLINE is a neurotransmitter that makes the muscle fiber contract *

VITality C

Pure Serum Concentrated of Vitamin C

PROFESSIONAL FORMULA

with Vitamin C 100,000 p.p.m. - 30 ml

30 ML

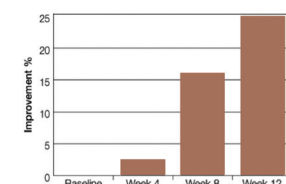

The Capri Beauty Line Laboratories have created a Pure Concentrated Serum capable of profoundly modifying the appearance of the skin thanks to the innumerable characteristics of **Vitamin C**, a powerful antioxidant ingredient that is not produced by our body and must necessarily be taken through food, supplements or topically.

Thanks to the high concentration of Vitamin C in the formula, this Concentrated Serum stimulates and increases the production of Collagen, reducing wrinkles and signs of aging.

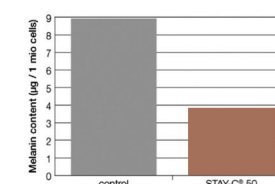

IT LIGHTENS THE SPOTS CAUSED BY THE SUN AND ACNE, BRIGHTENS AND REVIVES THE COMPLEXION OF THE FACE, SMOOTHING THE COMPLEXION AND BLOCKING THE FORMATION OF MELASMA OR CHLOASMA. IT PROTECTS THE SKIN FROM FREE RADICALS AND SKIN DAMAGE CAUSED BY THE SUN AND POLLUTION, AND FINALLY HELPS TO REDUCE ENLARGED PORES, IMPROVE ACNE AND SMOOTH SCARS.

Its texture, delicate and light, allows Vitamin C to be deeply absorbed by the skin without leaving superficial residues. Free of Petrolated Paraffins and Parabens, it is suitable for all skin types and can be applied both day and night.

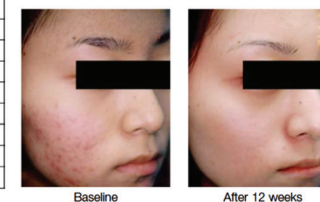

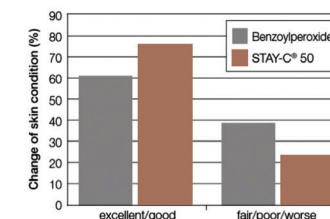

Primary human skin melanocytes treated for 4 days with 0.14% STAY-C 50® showed a 57% reduction in melanin content.

Dermatological evaluation of the spot lightening effect after 3 months with a cream with 3%. The color of the spots improved by 25% in 12 weeks.

STAY-C® 50

Evaluation of the efficacy after 12 weeks of application of 5% STAY-C® 50 twice a day on people with inflammatory and non-inflammatory acne lesions. The first graph highlights the improvement in skin condition of 77% on average. The figure shows an example of the improvement. The effectiveness of STAY-C 50® is greater than 5% compared to Benzoylperoxide, a common anti-acne drug.
